About me

Fullstack developer with +5 years of experience, passionate about technological innovation and code quality. Focused on creating efficient and scalable solutions, and committed to continuous learning. I constantly seek new challenges that allow me to grow professionally and contribute to the success of the projects I participate in.

Experience

Frávega Tech | Frontend Developer   *07/2024 – 07/2025 (1 year)*

- Maintain and develop various UIs using Next.js, React, and Vitest.
- Update legacy systems to modern architectures and technologies.
- Work closely with QA team to prevent potential bugs.
- Deploy new features in different environments for cross testing.
- Develop unit and e2e tests exceeding quality gate standards.
- Update old components to the new UI library following design guidelines.
- Collaborate with backend team to develop new tasks.
- Keep Jira tickets updated for proper task traceability.

WeDevelop | Fullstack Developer   *02/2024 - 07/2024 (6 months)*

- Develop and maintain a comprehensive recruitment and payroll management application.
- Break down user stories into smaller, manageable tasks to optimize team workflow.
- Implement and manage application deployments on Google Cloud, covering testing, development, and production environments.
- Design and generate migrations and data models for the database, ensuring integrity and efficiency.
- Collaborate with cross-functional teams to define and prioritize technical and functional requirements.
- Perform code reviews and provide constructive feedback to improve software quality.
- Participate in project planning and estimation to ensure timely delivery of features.
- Develop and execute unit and integration tests to guarantee software quality.
- Train and mentor team members on development best practices and new technologies.

Natural Tech House | Fullstack Developer   *06/2022 – 02/2024 (1 year and 8 months)*

- Development of institutional websites for Grupo Petersen using Next.js, React, Contentful, Jest, Gitlab.CI, among other technologies.
- Development of backoffice to manage and automate form information in CMS using React.js, Node.js, Express.js, MongoDB, among other technologies.
- Development of API to unify service calls consumed by the CMS, applying the BFF pattern with Node.js, Express.js, Swagger, and automated testing with Postman.
- Development of infrastructure to automate the deployment of the CMS component catalog, using Gitlab.CI, StoryBook, Vercel, and Docker.
- Development of a system for managing medical services using Next.js and Nest.js.

Grupo CMIC | Fullstack Developer   *11/2019 - 06/2022 (2 years and 8 months)*

- Development of a human resources personnel tracking system with payroll, leave management, and more, using Vue, Node.js, MySQL, and Sails.js.
- Development of a monitoring system for healthcare personnel and stretcher-bearers using Vue, Node.js, MySQL, and Sails.js.
- Development of a patient traceability system for pre-surgery using Vue, Node.js, Sails.js, and MySQL.
- Development of a system to manage purchase orders and monitor hospital engineering tasks in real-time using Vue, Node.js, Sails.js, WebSockets, and Socket.IO.

Education

Universidad Siglo XXI   *(2017 – 2020)*
System analyst (100%)

E.P.E.T N 5   *(2007 - 2012)*
Chemical Technician (100%)

Technical skills

JavaScript – Node.js – Next.js – React – TypeScript – MongoDB – MySQL – PostgreSQL – GraphQL – Nest.js – Git – GitHub – GitLab – CI/CD – Docker – Express.js – CSS – Tailwind – StoryBook – Jest – Vitest – Vue – Scrum – Jira – Figma – Sonar Qube – Dart – Flutter
